

## tegos becomes Microsoft Business Intelligence partner

---

**December 12, 2008. tegos GmbH has been certified by Microsoft officially as a Business Intelligence partner. A condition for the BI competency of Microsoft is the proof of qualified personnel and successfully implemented BI solutions.**

Business Intelligence (BI) is for some years a fashionable term referring to a set of tools, making the controlling of enterprises much more effective. BI converts operational data into information helping to make decisions faster and better. For the management of a company Business Intelligence implies: shorter response times, comprehensive information and higher transparency of decisions. Business Intelligence helps to plan better, to react faster and to calculate more precisely.

tegos uses the Microsoft SQL server for its BI-solutions especially the Analysis Services. German companies of the recycling and disposal industry like Mineraölr Raffinerie Dollbergen, Reclay GmbH or the Abfallwirtschaftsbetriebe Münster benefit from BI solutions delivered by tegos.

The broad range of activity of these enterprises, which are active in completely different fields of the recycling and disposal industry, points out the broad range of applications for Business Intelligence solutions. BI solutions from tegos are in each case individually designed and configured matching exactly the specific need for information of each enterprise.
